a rendering framework to the needs of the Apache Velocity project was not easy, so at some point, we decided to redo this (almost) from scratch. ... to take a stab at rendering the existing Velocity Docs that are end-user specific (Users Guide, Developers Guide, Reference and the likes) through DocBook.

### DocBook Framework (DBF) - The Apache Software Foundation

The Apache HTTP Server, colloquially called Apache (/ ə ' p æ tʃ i / ə-PATCH-ee), is a free and open-source cross-platform web server software, released under the terms of Apache License 2.0. Apache is developed and maintained by an open community of developers under the auspices of the Apache Software Foundation.. The vast majority of Apache HTTP Server instances run on a Linux ...

**Apache HTTP Server - Wikipedia**

An overview of Tapestry. Perhaps the hardest part of understanding Tapestry is the fact that it is component-centric not operation-centric. Most web technologies ( Struts, servlets, PHP, etc.) are operation-centric. You create servlets (or Actions, or what have you) that are invoked when a user clicks a link or submits a form.
