Problem. (A4, IMO SL, 2019) Let a be a positive integer and b be real numbers such that Define the set S by. Prove that, if S is non empty, then. Solution. We may assume $a > 0$, that's if then $a < 0$. We also assume $b_i \geq 0$, since removing zeroes doesn't change anything. Denote by S^c the complement of S in \mathbb{R} , i.e.. It's enough to prove $S \neq \emptyset$. Indeed, Consider the sets S and S^c . It easily follows that if $S \neq \emptyset$ then implying $S \neq \emptyset$.

4 IMO 2016 Hong Kong A6. The equation $(x-1)(x-2) \dots (x-2016) = (x-1)(x-2) \dots (x-2016)$ is written on the board. One tries to erase some linear factors from both sides so that each side still has at least one factor, and the resulting equation has no real roots. Find the least number of linear factors one needs to erase to achieve this. A7.
