Jap Small Engine

JAP engines were extensively used in cyclecars in the 1910 to 1914 period when they were popular with small manufacturers. In 1914 JAP announced a new engine made specifically for the cyclecar: a V-twin of 90mm bore and 85mm stroke (1082cc). The engine had a larger flywheel than the motorcycle engine and an enclosed magneto drive.

Used Engines From Japan, JDM Engines For Sale In Japan ...

Unlike their U.S. counterparts, Japanese engines typically don't have as many miles on them. In Japan, most people rely on public transportation due to the high costs of maintaining a car. The inspections that cars need to pass are also stricter in Japan. If a car does not pass the inspection, it is dismantled or destroyed.

This was an Aussie-only single cam turbo engine not even found in a Nissan, but in a Holden four-door saloon. Despite having 12 less valves and one less cam than the other versions, and pushing out less power than even the RB20DET as standard, with a bit of tuning it was soon realised even 1,000bhp was possible, and with massive torque thanks to having the three-litre engine.
